Subject: Application for Developer Position

Dear Sir/Madam,

I am writing to express my keen interest in the Developer position at Oddo. With a solid background in back-end development, CI/CD automation, and infrastructure management, coupled with hands-on experience in Python and the Django framework, I am confident in my ability to contribute to your engineering team's velocity and operational efficiency.

In addition to my core expertise as a C# .NET developer, I have expanded my skill set to include Python development with Django, building scalable and maintainable web applications. This complements my experience with Java (Spring), JavaScript, jQuery, and PHP (Laravel), allowing me to work effectively across diverse technology stacks and bridge gaps between systems.

In my previous role at Twenty Third Century Systems, I:

- Designed and implemented robust CI/CD pipelines, reducing deployment time and improving reliability across multiple teams.

- Developed and maintained back-end services in Java and Python/Django, ensuring security, scalability, and clean architecture.

- Applied DevOps best practices using tools such as GitLab CI, Jenkins, Docker, Kubernetes, and Helm to streamline development and deployment workflows.

- Integrated tools like Prometheus and Grafana to enhance system observability and performance monitoring.

- Played a key role in the development and deployment of Zimbabwe's flagship government systems: the **Companies and Intellectual Property Registration** application (cipz.pfms.gov.zw) and the **Liquor Licensing Registration** platform (llb.pfms.gov.zw).

-

These projects involved full lifecycle development, from designing secure and normalized database structures to implementing API endpoints and deploying applications in production environments.

I am particularly enthusiastic about joining Oddo because of your commitment to engineering excellence and innovative development culture. My diverse background in programming, DevOps, and systems integration enables me to tackle complex technical challenges while promoting collaborative and productive team environments.

Thank you for considering my application. I would be delighted to further discuss how my skills and experiences can contribute to Oddo's success. Please feel free to contact me at your convenience.

Best regards,
Oliver Chimuka
